Technical requirements Cyriel Kortleven

This document gives an overview of the preferences of Cyriel Kortleven when he gives an interactive presentation. If some of the requirements aren't possible, then we find of course a creative solution.
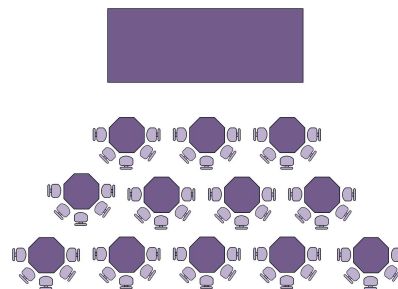

Technology

I'll bring my own laptop (Mac Book Pro)

- one little table for laptop (and projector)

- projector + screen

- VGA cable (connecting directly to the projector)

- Audio in the room (for computer sound output)

- wireless headset (I walk and move a lot on stage)

- flipchart with paper + markers (2 different colors is enough)

- bottle of water + glass

I will arrive minimum 30 minutes in advance to set up the laptop and check the connection with the projector.

Room setup

Cabaret style (groups of tables) would be nice although any room set up will work.

Delegate materials

The handout of the presentation will be available via slideshare. Cyriel will send this link to the delegates who are interested in the slides or will be send to the organiser who can distribute the digital handout of the slides after the presentation.
